Continuation of 5. does NOT place the application in condition for allowance because: as stated previously it is believed that Inoue et al. does in fact provide motivation for the use of his product for shock absorption. Furthermore, Fehlberg requires only the use of a resilient material in the mount assembly, which in this case would have been the ASUWAN with it's enhanced properties. In addition it has been ruled by the courts "the discovery of a previously unappreciated property of a prior art composition, or of a scientific explanation for the prior art's function, does not render the old composition patentably new to the discoverer", see Atlas Powder Co. v. Ireco Inc., 190 F.3d 1342, 1347, 51 USPQ2d 1943, 1947 (Fed. Cir. 1999). As such it is the position of the examiner that the rejection is proper.
